### Water Consumption Rates

[BLMC Chapter 13.04.100](#)

Water consumption is recorded by water meters in cubic feet (7.48 gallons = 1 cubic foot). Water meters are read in hundreds of cubic feet (CCF).

Water Consumption Rates		
Winter - October 1 <sup>st</sup> to May 31 <sup>st</sup>	Inside City Limits	Outside City Limits
0 - 10 CCF per month	\$1.41	\$2.04
Over 10 CCF per month	\$2.79	\$4.07
Summer - June 1 <sup>st</sup> to September 30 <sup>th</sup>	Inside City Limits	Outside City Limits
0 - 10 CCF per month	\$1.41	\$2.04
11 - 20 CCF per month	\$3.05	\$4.27
21 - 30 CCF per month	\$4.27	\$5.99
31 or more CCF per month	\$5.49	\$8.37

Note: Each meter cannot be read on exactly the first day of the changeover month (from winter to summer rates or from summer to winter rates). For example, if the rate changes in June and the meter is read May 13th, the May 13th reading will be the beginning read going into summer rates. The reverse is also true for the changeover from summer to winter rates.
