

**CITY OF BONNEY LAKE - PUBLIC WORKS  
2008 CAPITAL IMPROVEMENTS SCHEDULE**

Current Status Date: 2/29/2008			
Project	Project Summary	Current Status	
<b>Street CIP Projects</b>			
1	75th Street Overlay & Waterline (Design & Construct)	The City will rebuild 75th Street from Locust Avenue to 190th Avenue and replace the water line from Locust Avenue to 191st Avenue. The project will include a pavement overlay, constructing curb, gutter, and sidewalk along the south side of the roadway, and re-establishing the drainage ditch along the north side of the road. Construction is planned for summer of 2008.	Advertisement for Construction bids will be closing March 13, 2008.
2	192nd Corridor - Land Acquisition	The City is in process of acquiring needed property to complete the Right-of-way (ROW) for corridor improvements.	This is on-going as funds become available and agreements with property owners are completed.
3	Old Sumner Buckley Hwy & SR410 Intersection Improvements (Design)	The City is working with the Cascadia development to complete design for improvements to the intersection of SR410 and Old Sumner Buckley Hwy. Improvements include new curb, gutter, and sidewalk, an additional left turn lane off of SR410 and a new receiving lane on OSB Hwy.	In the design phase.
5	Downtown - 184th Ave Corridor	As part of the City's new downtown improvement plan, the City will be reconstructing the roadway along 184th Avenue (Main Street) between SR410 and OSB Hwy. Construction is planned for fall of 2008.	Design Underway
6	Bonney Lake Blvd Reconstruction & Waterline (Design & Construct)	The City will rebuild the Bonney Lake Blvd from 181 <sup>st</sup> Avenue to Locust Avenue and rebuild 183 <sup>rd</sup> Avenue from Bonney Lake Blvd to 74 <sup>th</sup> Street. The project along Bonney Lake Blvd will include a pavement overlay, constructing curb, gutter, and sidewalk along the north side of the roadway, and re-establishing the drainage ditch along the south side of the road. The project along 183 <sup>rd</sup> Avenue will include a pavement overlay, storm drainage improvements, and construct curb gutter, and sidewalk along the east side of the roadway. Construction is planned for summer of 2008.	In final design phase
7	Sidewalk Replacement on Locust (Construct)	The City will build approximately 300 feet of new sidewalk along the west side of Locust Blvd, north of Old Sumner Buckley Hwy. Construction is planned for summer of 2008.	Current Bids were over budget. Project will connected with the Bonney Lake Blvd project.
8	2008 Sidewalk Replacement - SR410 Corridor (Design)	The City will complete a 30% design for completing sidewalk along SR410 between 184th Avenue and 192nd Avenue that includes the Angeline bridge.	The City is in the process of selecting professional services for the project.
9	2008 Street Light Program (Construct)	The City is continuing its project to place street lighting at road intersections and major arterials inside city limits.	on-going
<b>Storm Water CIP Projects</b>			
1	Downtown West Drainage Project	As part of the City's new downtown improvement plan, the City will be constructing a regional storm water infiltration pond to accommodate the development of the downtown area. Construction is planned for fall of 2008.	in design phase
2	Church Lake Park Improvements	The City will be constructing an improved drainage way along Church Lake Drive and through Church Lake Park. Construction is planned for summer of 2008.	Work to be completed by City

2008 CAPITAL IMPROVEMENTS SCHEDULE**

Current Status Date: 2/29/2008			
Project	Project Summary	Current Status	
<b>Sanitary Sewer Utility CIP Projects</b>			
1	192nd Corridor - Sewer & Water Improvements (Design and Construct)	The City will build new water and sewer infrastructure along 192nd Avenue from SR410 south to the end of the public road. This is part of the continuing 192nd Corridor project. Construction is planned for fall of 2008.	Working towards final design.
2	BNSF Undercrossing (Slip Lining) - Sewer Trunk Line Improvements	This project is a phase of the City's project to rebuild the sanitary sewer trunk line from Old Sumner Buckley Hwy to the Sumner WWTP. This phase will slip line approximately 865 feet of existing 30-inch pipe with new 27-inch pipe under the BNSF railroad. Construction is planned for spring of 2008.	Council to review Notice of Award.
3	SR410 16-inch Replacement - Sewer Trunk Line Improvements	This project is a phase of the City's project to rebuild the sanitary sewer trunk line from Old Sumner Buckley Hwy to the Sumner WWTP. This phase will replace approximately 865 feet of existing 16-inch pipe with new 16-inch pipe along SR410. Construction is planned for fall of 2008.	In design phase
4	Septic System Reduction Program - 94th Street E	This project will extend the City's sewer system along 94th Street west of 1978th Avenue. As part of the project, the City will replace the old 6-inch water pipeline with 8-inch pipe to meet current standard requirements. Construction will be completed in two phases and is planned in the fall of 2008 and spring of 2009.	The city is in the process of selecting a consultant for design.
5	Sewer Line Repair (Force Main @ Angeline Rd)	The City will replace the existing sanitary sewer force main along Angeline road, from the Willow Creek lift station to the City's main Lift Station at SR410. Design will be completed in 2008 and Construction is planned for spring of 2009.	The city is in the process of selecting a consultant for design.
<b>Water Utility CIP Projects</b>			
1	Lakeridge Tank Cleaning and Recoating	The City will be repainting both the inside and outside of their 800,000 gallon water tank located near Lakeridge middle school. Construction is planned for summer of 2008.	Advertisement for Construction bids will be closing March 13, 2008.
2	Leaky Main PWTF - 95th Loop & 181st Ave Project (R11 & R13)	As part of the City's Leaky Water Main Reduction Project, the City will be replacing and upgrading the older water pipelines along 181st Avenue and 95th Loop Street. Construction is planned for summer of 2008.	Design Underway
3	Leaky Main PWTF - Cedar View & 188th Avenue (B16, P7, P8)	As part of the City's Leaky Water Main Reduction Project, the City will be replacing and upgrading the older water pipelines along 188th Avenue between Bonney Lake Blvd and 80th Street and along 202nd Avenue and 210th Avenue in the Cedar View neighborhood. Construction is planned for fall of 2008.	Design will start in March of 2008
4	Leaky Main PWTF - R4, R5, B17	As part of the City's Leaky Water Main Reduction Project, the City will be replacing and upgrading the older water pipelines along 197th Avenue on Interlake Island, along West Tapps Dr east of South Tapps Drive, and along Church Lake Drive between 71st Street connections. Construction is planned for spring of 2009.	Design will start in fall of 2008
5	TWD Intertie - Booster Pump Station Project	The City will construct a new water pump station to supply water by connecting to the Tacoma Water District's pipeline and pump the water into the City's water system. The new pump station will be constructed to supply up to 4 million gallons of water a day. Construction is planned for summer of 2009	Land lease agreement to be approved.
6	TWD Intertie - Pipeline Project	The City will construct a new 16-inch water pipeline as part of the connection to the future pump station that will connect the Tacoma Water District's pipeline to the City's water system. Construction is planned for summer of 2009.	Land lease agreement to be approved.
